Aztec-Pictured Cliffs Pool

Dear Mr. Geren:

Forms C-102 filed with the intention to drill subject well indicate 160 acres dedicated to the well. The Dependent Re-survey plats dated July 2, 1952 indicates that the southeast quarter of section 26 contains only 151.18 acres.

Rule 5 (A) of order R-1670 stipulates that a standard proration unit for the Aztec-Pictured Cliffs Pool consists of a quarter section containing between 158 and 162 acres.

Rule 5 (B) explains the administrative procedure for obtaining an exception to Rule 5 (A).

The administrative work may be done as the hole is being drilled, but we cannot approve the well for production until the non-standard proration unit has been approved.

Yours very truly,

A. R. Kendrick
Engineer, District #3
