This Sundry Notice is to confirm a phone conversation with the Minerals Management Service on 4-19-82. The Sundry Notice of 4-10-82 contained a typographical error in that it stated Class "G" cement was used to cement the surface casing. In fact, Class "B" was used; therefore, all notices, reports, etc. thereafter stating Class "B" was used are correct.

The setting depth of the 4-1/2" production casing was 1,768.5' K.B.; therefore, depending on how you round either 1,768' K.B. or 1,769' K.B. would be correct.
