RE: Application for Nonstandard Location
Manana Gas, Inc.
Ransom # 1M, 1240'FSL, 2435'FEL
0-13-29N-11W, San Juan County
Aztec Fruitland and Aztec Pictured Cliffs Pools

Gentlemen;

We hereby request a nonstandard location for a well to be drilled 1240 feet from the South line and 2435 feet from the East line of Section 13, T29N, R11W, San Juan County, due to topographical conditions.

Any standard location in the south half of the southeast quarter-section would be located in an irrigated field.

We have located the well as far south and east as we believe safe due to the location of the irrigation canal shown on the well location plat and avoid damage to the irrigated field.

Copies of this application are being sent by certified mail to all offset operators of wells which are completed in the Pictured Cliffs formation and shallower. The names and addresses of all these operators are shown on an attached sheet.

Also enclosed are the well location plat and an offset ownership plat.

If further information is needed, please contact us.

Yours very truly,
