13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depth for all markers and zones pertinent to this work.)*

D.J. Simmons Inc. is requesting authority to surface co-mingle the production from the newly completed Simmons E3C well with the Simmons #5 well. The production would be allocated by subtracting the known Simmons #5 production rate from the total combined rate and applying the historical decline rate from the Simmons #5. The Simmons #5 is a Pictured Cliffs well producing gas with a BTU value of 1200. It is anticipated that the BTU value of the Simmons E3C will be 1260. A site explanation and site security diagram are attached. Note that the E3C is a directional well drilled from the Simmons #5 well pad.

14. I hereby certify that the foregoing is true and correct
