DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill the above well with rotary tools to an approximate total depth of 4400' and test Pictured Cliffs possibilities. Stimulation and completion will be indicated upon reaching this depth.

The following casing program is proposed:

SIZE	DEPTH	CEMENT	REMARKS
8-5/8"	500'	---	Test--circulate to surface.
5-1/2"	4400'	---	100% of theoretical amount to obtain sufficient fill to adequately cover Fruitland zone.

Copies of location plat are attached. A copy of my survey run will be submitted upon completion of well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
