Rosa Unit

Farmington, New Mexico April 27, 1960

Well No. 33 is located 950 ft. from SW line and 900 ft. from E line of sec. 22

SE/4 SE/4 of Section 22 T-31-N R-4-W N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Wildcat
(Field)

Rio Arriba
(County or Subdivision)

New Mexico
(State or Territory)

The elevation of the derrick floor above sea level is 7220 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

As a result of not obtaining gas in commercial quantities, Rosa Unit No. 33 was plugged and abandoned as follows on April 22, 1960:

1. Pulled 2-3/8" tubing.
2. Spotted 50 sacks cement plug in 5-1/2" casing 3945' - 4272' and squeezed with 1000 psi.
3. Filled hole with fluid.
4. Pumped 50 sacks cement plug in 5-1/2" - 8-5/8" annulus and squeezed with 550 psi.
5. Removed well head and surface equipment.
6. Spotted 5 sacks of cement for surface plug (0-40') and erected dry hole marker.
7. Plug and abandonment by above procedure to permit possible future re-entry in the event other zones are discovered to be productive in the area.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
