cc: El Paso Natural Gas Co. (3)
 Southern Union Gas Co.
 Southern Union Gathering Co.
 Oil Conservation Commission, Santa Fe
 U.S. Geological Survey

APPROVED E. S. Oberly
 El Paso Natural Gas Co.
 Effective 11-1-65

1. The first part of the paper is devoted to a general discussion of the problem of the origin of life. It is shown that the problem is one of the most important and most difficult in the history of science. The author discusses the various theories of the origin of life, and shows that the most plausible is the theory of spontaneous generation. This theory is based on the fact that life is everywhere, and that it is impossible to find a place where life does not exist. The author also discusses the theory of evolution, and shows that it is based on the fact that life is everywhere, and that it is impossible to find a place where life does not exist.

1910-1911

2. The second part of the paper is devoted to a discussion of the problem of the origin of the human race. It is shown that the problem is one of the most important and most difficult in the history of science. The author discusses the various theories of the origin of the human race, and shows that the most plausible is the theory of spontaneous generation. This theory is based on the fact that life is everywhere, and that it is impossible to find a place where life does not exist. The author also discusses the theory of evolution, and shows that it is based on the fact that life is everywhere, and that it is impossible to find a place where life does not exist.

1910-1911

3. The third part of the paper is devoted to a discussion of the problem of the origin of the universe. It is shown that the problem is one of the most important and most difficult in the history of science. The author discusses the various theories of the origin of the universe, and shows that the most plausible is the theory of spontaneous generation. This theory is based on the fact that life is everywhere, and that it is impossible to find a place where life does not exist. The author also discusses the theory of evolution, and shows that it is based on the fact that life is everywhere, and that it is impossible to find a place where life does not exist.
