13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

J.M. Huber Corporation believes that the Pictured Cliffs formation in this well is non-productive. This belief is based on the fact that the wells total production did not change and the Btu value of the gas did not change after the Pictured Cliffs was completed. Since the Pictured Cliffs formation in this well is non-productive, all of the production will be allocated to the Basin Fruitland Coal and no downhole commingling application will be filed. For additional information, please refer to Mr. Joe Hewitt.
