Blanco Mesa Verde

RECEIVED
MAR 13 1996
OIL CON. DIV.
DIST. 3

Dear Mr. LeMay,

This is a request on behalf of Williams Production Company for administrative approval for a non-standard gas location in the Blanco Mesa Verde pool for the referenced well.

The well is staked on a relatively level ridge which slopes sharply to the east and west. The proposed spacing unit is all of Section 6, T31N, R5W, which is 264.56 acres due to a variation in the legal subdivision of the U.S. Public Land Surveys.

The ridge spreads out and continues south and east. Most of the rest of this ridge top contained concentrated archaeological sites and artifacts and an area large enough for a well pad could not be located. Any legal locations to the east, below the ridge top, were on steep, heavily wooded areas which are prime habitat for deer and elk. No other alternative to the proposed location was identified.

As the Unit Operator of the Rosa Unit, Williams Production is the only offset operator. Attached is a plat indicating the well location and proposed spacing unit and a topographical map of the area.

Thank you for your consideration and approval of this application. If you have any questions please do not hesitate to call upon me.

Sincerely,

Paul C. Thompson, P.E.
President, Walsh Engineering
