December 30, 1953

Well No. 6 is located 1650 ft. from S line and 1650 ft. from W line of sec. 3333, Section 33  
( $\frac{1}{4}$  Sec. and Sec. No.)11 N 4 W  
(Twp.) (Range)N.M.P.M.  
(Meridian)Wilcox  
(Field)Elizabethtown  
(County or Subdivision)New Mexico  
(State or Territory)The elevation of the derrick floor above sea level is 6671 ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The operation of this well was turned over to the Phillips Petroleum Company temporarily, on November 19, 1953. The following is a summary of operations from November 19, 1953 to December 21, 1953:

On November 27, 1953, a Hesco D.C. bridge plug was set at 3500', and the 7" casing was perforated from 3552' to 3544' and from 3530' to 3506', 3 jet shots per foot.

On November 28, 1953, the well tested 4890 MCF per day. On November 30, 1953, 2" EUE tubing was run and set at 3573'. The well was shut in and is still shut in as of December 21, 1953.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
