Emery C. Arnold
New Mexico Oil Conservation Commission
1000 Rio Brazos Road
Aztec, New Mexico

Dear Mr. Arnold:

SUBJECT: Annual Deliverability Test,
El Paso Natural Gas Company
Well, Thompson No. 2,
M 34-30-8.

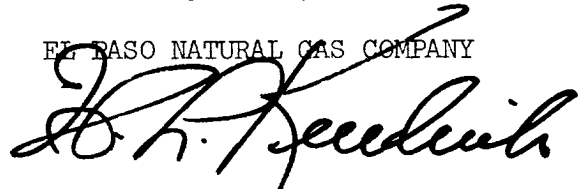

The above referenced Mesa Verde well was first delivered after work-over on November 16, 1961. An initial production test was conducted in December 1961 and an annual filed immediately thereafter. The producing ability indicated by the initial production test and the subsequent annual do not truthfully reflect the producing capability of this well. We have just recently completed the 1962 annual deliverability test and we respectfully request that this test be used for proration purposes for the remainder of 1962 and for the 1963 proration year.

The average producing ability for February 1962 was 1208 MCF/D, for March 1025 MCF/D and for August 1227 MCF/D.

If there are any questions regarding this test please call on us.

Yours very truly,

EL PASO NATURAL GAS COMPANY

H. L. Kendrick
Area Gas Well Test Engineer
