Dear Sir:

Review of the deliverability test on file for the New Mexico Com "G" Well No. 1 reveals that the static pressure of this well is inconsistent with past history and results in a large reduction of the deliverability of this well. Permission to retest is therefore requested to prevent unreasonable curtailment of production in 1971.

By copy of this letter to El Paso Natural Gas Company, we request that a retest be scheduled.

Yours very truly,

G. L. Eaton  
District Superintendent
