[illegible]

1. The first group of authors (see Table 1) has been concerned with the effects of the type of stimulus on the response. The stimulus has been varied in terms of the number of stimuli, the type of stimulus, the duration of the stimulus, and the intensity of the stimulus. The response has been varied in terms of the number of responses, the type of response, the duration of the response, and the intensity of the response. The results of these studies have been mixed, with some studies showing a positive relationship between stimulus and response, and others showing no relationship.
