J. H. Watkins

*Should waivers from all offset operators not accompany an application for administrative approval, the New Mexico Oil Conservation Commission will hold the application for a period of twenty (20) days from date of receipt by the Commission's Santa Fe office. If, after said twenty-day period, no protest nor request for hearing is received by the Santa Fe office, the application will then be processed.

NOTE: If the proposed multiple completion will result in an unorthodox well location and/or a non-standard proration unit in one or more of the producing zones, then separate application for approval of the same should be filed simultaneously with this application.

NEW MEXICO OIL CONSERVATION COMMISSION
PACKER SETTING REPORT

I, Leon J. Abrusley, being of lawful age and having full
Name of party making report

knowledge of the facts hereinbelow set out do state:

That I am employed by Tenneco Oil Co. in the capacity of

Drilling Engineer, that on May 31, 19 65

I personally supervised the setting of a Baker Model "D" Production Packer At 6,800'

in Tenneco Oil Co., 1680 PHL 830 PHL
Make & type of packer
Operator of well, Florencia/Lk Sec. 31 Twp 30N,
Lease name

Well no. # 44 located in the Basin Dakota field,

San Juan county, state of New Mexico, at a subsurface depth of

6,800' feet, said depth measurement having been furnished me by

Wolox A Division Of Halliburton Co.;

That the purpose of setting this packer was to effect a seal in the annular space between two strings of pipe where the packer was set so as to prevent the commingling, in the bore of this well, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer; that this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.
