Farmington, New Mexico, March 30, 19 53Well No. B-1 is located 930 ft. from N line and 990 ft. from E line of sec. 31
NE 1/4 of Section 31 T-30-N, R-9-W NM
 (1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Blanco-Mesa Verde
(Field)San Juan
(County or Subdivision)New Mexico
(State or Territory)

The elevation of the derrick floor above sea level is _____ ft. (To be reported later)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill the above well to approximately 4900 feet. Rotary tools will be used to total depth. Casing will be set on top of Cliffhouse. Mesaverde formation will be drilled with gas and cleaned out with gas after shot with SNG.

The following casing program is proposed:

Size	Depth	Cement	Remarks
9-5/8"	250	225	175% of calculated amount to circulate.
7"	4100	300	150% of calculated amount to fill 1260' above shoe.

Copies of location plats are attached. A copy of any survey taken will be submitted upon completion of well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
