

New Mexico  
OIL CONSERVATION COMMISSION  
Aztec, New Mexico

September 11, 1958

Robert H. Long  
309 North Orchard  
Farmington, New Mexico

Dear Sir:

This office has received copies of Notice of Intention to Drill on your #1 Wood well located in the NE<sup>1</sup>/<sub>4</sub> Section 35-30N-11W.

We are unable to determine from the information furnished what the proposed depth of this well will be or what formation you are proposing to complete in. Will you please re-submit Notice of Intention to Drill to this office listing the following information:

- (1) Depth projected.
- (2) Amount and size of surface casing and amount of cement to be used.
- (3) Amount and size of production casing and amount of cement you propose to use.

The plat you have submitted is correct for an oil well dedication. In the event gas production is encountered, however, it will be necessary that you submit form C-128 dedicating the entire North-east Quarter of Section 35.

If we can be of any service in this matter, please contact us.

Yours very truly

Emery C. Arnold  
Supervisor, Dist. #3
