(Twp.)

16W  
(Range)

RMN  
(Meridian)

Wildcat  
(Field)

San Juan  
(County or Subdivision)

New Mexico  
(State or Territory)

The elevation of the ground level above sea level is 5294 ft.

### DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

Drill 9 3/4" hole to approx. 40' and run 7 5/8" surface pipe cemented to the surface. A 6 3/4" hole will then be drilled to a sufficient depth to test the Teedie Formation, approx. 1600'. If commercial production is encountered, a 1 1/2" csg. will be run and cemented and the well sand-oil fractured.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
