July 5 -  
Aug 7 -

Dear Mr. Arnold:

The above captioned well was tied into the Gathering System of El Paso Natural Gas Company on July 5, 1956. This well was kept shut-in until a maximum wellhead pressure was obtained. By doing so, the well did not deliver any gas into the pipeline until August 7, 1956. We therefore request that an extension of 15 days be granted for the delinquent date for filing an initial production test.

This 15 day extension date causes the initial production test to be due on September 3, 1956.

Very truly yours,

  
H. L. Kendrick  
Gas Engineer
