## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose move in rotary tools, clean out to present TD of 4574, drill with gas to approximately 5200' (or to top of Manos). Sand-oil treat the Point Lookout formation for gas completion in entire Mesa Verde section.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
