Delhi-Dudrick
Well No. #3 is located 790 ft. from ~~100~~ ^[N] line and 1650 ft. from ~~100~~ ^[E] line of sec. 29
N 1/4 Sec. 29 30N 10W 100M
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Undes, Dakota San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the ^{G. L.} ~~Altitude~~ above sea level is 6171 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The original drilling program was altered and the 7 5/8" casing was eliminated. 7 7/8" hole was drilled w/mud to T. D. 7360'. 5 1/2" 17 J-55 casing was set at 7360' with a DV tool at 3763'. The lower stage was cemented with 150 sx., 50/50 Pomix, 4% gel, and had 12 1/2 pounds of gilsonite per sx. 75 sx. of latex immediately followed this job. Good returns were obtained throughout the job and 2000 pounds of pressure was applied to the casing with no drop. A temperature survey indicated the top of the cement to be 5920'. The top stage was cemented with 100 sx. w/4% gel. Good returns were obtained and a 2000 pound pressure was held against the casing with no loss. A temperature survey indicated the top of the cement to be 3260'.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
