(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Pan American Federal "G" Farmington, New Mexico, July 26, 1963

Well No. 1 is located 1830 ft. from S line and 1795 ft. from W line of sec. 19NE/4 SW/4 Section 19  
(1/4 Sec. and Sec. No.)T-30-N, R-12-W  
(Twp.) (Range)N.M.P.M.  
(Meridian)Basin Schute  
(Field)San Juan  
(County or Subdivision)New Mexico  
(State or Territory)

The elevation of the derrick floor above sea level is \_\_\_\_\_ ft. (To be reported later)

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill the above well to an approximate depth of 6600 feet with rotary tools to evaluate Schute prospects. Stimulation and completion will be as indicated upon reaching total depth. The following casing program is proposed:

Size	Depth	Weight	Remarks
8-5/8"	350'	250 cu.	Quintrength - circulate.
4-1/2"	6600'	1150 cu.	Casing will be cemented in two stages. First stage sufficient cement to bring top cement back to about 300' above top of Mancosque. Second stage tool will be set 100' below base of Pictured Cliffs and cemented with sufficient cement to circulate to surface.

A copy of any survey taken will be submitted upon completion of well. Copies of location plot are attached.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
