Houston 2, Texas

Dear Sir:

We have been informed by Mr. Charles Warner of Northwest Production Corporation, that your well WMP Unit 2, located SW 23-30-14 has been plugged back from the Dakota to the Mesa Verde Formation. Since this, in effect, makes it a new well, the New Mexico Oil Conservation Commission requires a new Form C-11, be approved before we can resume production.

As of this morning, the Commission office in Artes has not received a new Form C-11, therefore, we will continue to leave the well shut in until such time as necessary forms are approved.

If our information is incorrect, we would appreciate hearing from you as to the correct status of your well.

Very truly yours,

EL PASO NATURAL GAS COMPANY
