Farmington, New Mexico January 11, 1957Well No. 1 is located 1780 ft. from N line and 913 ft. from W line of sec. 23SW/4 of Section 23 T-30-N R-16-W NMPM  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Wilcat San Juan New Mexico  
(Field) (County or Subdivision) (State or Territory)The elevation of the derrick floor above sea level is 5314 ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On January 4, 1957, 5-1/2" casing was landed at 10,798 feet and cemented with 450 sacks slo-set cement with 8% gel and one pound Tuf-plug per sack followed by 100 sacks slo-set. After waiting on cement for forty-eight hours, plug was drilled and casing and water shut off were tested with 2000 pounds pressure for thirty minutes with no drop in pressure. Completion operations were begun.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
