17. DESCRIBE PROPOSED OR COMPLETE OPERATIONS (Clearly state pertinent details, and give pertinent dates, including estimated date of starting, and proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.) *

A hole apparently has come in the casing at an estimated depth of 3,000'-3,200',
dumping mud and water into the well bore killing the well.

We propose to circulate out the well with fresh water, set a bridge plug below the
hole and squeeze with cement, pull out and place well back on production.
