DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

After recovering lead oil used during additional work on upper Gallup formation, completed as pumping oil well Horseeshoe Gallup Field. Potential test November 26, 1959, pumped 27 barrels of oil in 24 hours with 13-42" strokes per minute with 1-1/4" pump. Gravity 41 degrees. Gas-oil ratio not yet available.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
