DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

E. E. Elliott "A" No. 2 was spudded on September 5, 1950, and on September 6, 1950, 8-5/8" casing was set at 318 feet with 240 sacks of cement. After waiting on cement for 24 hours, casing and water shut-off were tested with 400 pounds pressure for thirty minutes which held with no drop in pressure. Reduced hole to 7-7/8" at 318 feet and resumed drilling operations.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
