The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

J. J. Lomeri "A" Well No. 5 was spudded on July 31, 1959, and on August 1, 1959, 8-5/8" casing was set at 212' with 160 sacks cement containing 25 Calcium Chloride. Circulated cement. After waiting on cement, casing and water shut off were tested with 450 pounds for 30 minutes, which held with no indication of pressure drop. Reduced hole to 7-7/8" at 215' and continued drilling.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
