13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Recently Amoco Production Company requested that the APD to deepen this well be cancelled and that we be allowed to permanently plug and abandon the wellbore per our previously approved P&A procedures dated March 1997. This request was made not realizing we had cancelled the P&A procedures in August of 1998. We now realize new procedures need to be submitted for the P&A operations. Therefore, we are requesting the attached procedures be approved for plugging this well.

If you have any questions please contact Gail Jefferson at (303) 830-6157.

14. I hereby certify that the foregoing is true and correct

Signed

Gail M. Jefferson

1. Notify regulatory agencies (BLM, NMOCD, FIMO) 24 hours in advance of plugging activity. Contact BLM and indicate well is allotted (FIMO regulations effective April 1, 1997).
2. Check location for anchors. Install if necessary. Test anchors.
3. MIRUSU. Blow down well. Kill if necessary with fresh water. NDWH. NUBOP.
4. TOH with 1 1/4" tubing. Run in hole with 1 1/4" tubing work string and CIBP, set CIBP at 2311'. Test casing integrity to 500 psi. Spot cement plug from 2311' to 2211' (28 sacks). TOH to 2099', spot cement plug from 2099' to 1999' (28 sacks). TOH, rig up wireline, TIH, perforate at 1106'. Set retainer and circulate cement to surface (279 sacks). Spot cement plug on top of retainer to 896' (31 sacks). TOH to 161', spot 161' cement plug to surface (46 sacks).
5. NDBOP. Cut off casing and wellhead. Install PXA marker according to BLM or State requirements.
6. Contact FMC and ship surface equipment to yard or other location per instructions.
7. Provide workorder to Buddy Shaw for reclamation.
8. Rehabilitate location according to BLM or State requirements.
