DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On June 17, 1959, 5-1/2" casing was set at 3613 feet with 80 sacks 6 1/2 gal cement mixed with 1-1/2 pounds Tuf-Plug per sack followed by 70 sacks neat. After waiting on cement, tested casing with 3000 psi for thirty minutes with no indication of pressure drop. Resumed completion operations.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
