DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The above well was converted to a water injection well on 3-25-62 as follows:

1. Hot oiled casing annulus and pumped backload.
2. Moved in and rigged up pulling unit and pulled rods and pump.
3. Ran casing scraper on tubing and circulated hole clean with oil.
4. Displaced oil with treated water and pulled tubing.
5. Ran 2-3/8" tubing with Baker Model N packer set at 3662'.
6. Hooked up to injection system and started injecting water down tubing and annulus into lower and upper Gallup zones 3-25-62.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may
