(State or Territory)

The elevation of the derrick floor above sea level is 6082 ft. (C.I.)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate muddling jobs, cementing points, and all other important proposed work)

Well was drilled to a total depth of 5210 feet with rotary tools. Natural test on Main Verde section with pilot tube was 1,210 MCF/24. Shot formation from 4471 to 5210 feet open with 1672 quarts dynamite blowing explosive. Well was cleaned out to total depth with gas and 2" tubing was landed at 5183 feet. Well shut in 94 hours. Shut in casing pressure 1099 psi. After 4 hour blow down well measured 17,725 MCF per 24 hours through 2" casing outlet through 3" side static nipple June 23, 1952. Well was shut in for pipe line connection.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
