DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate muddling jobs, cementing points, and all other important proposed work)

The well was spudded at 11:30 P.M., May 24, 1952. On May 26, 1952, 9-5/8" casing was landed at 265 feet and cemented with 230 sacks of cement. Cement circulated to surface. Cement plug down at 2:00 A.M., May 26, 1952. At 3:30 P.M., May 27, 1952, casing and water shut-off were tested at 600 pounds for 30 minutes, with no drop in pressure. Forty-one feet of solid cement were drilled in bottom of pipe and water shut-off was again tested at 600 pounds for 30 minutes. There was no drop in pressure during this test and drilling operations were resumed.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
