13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Condor, the present unit operator, intends that an infill well be drilled and waterflood operations expanded, initially to one five spot pattern to confirm the feasibility of further infill development and waterflooding on a 20 acre pattern, which would include this well. Until expansion to full scale waterflooding takes place, Condor is hereby requesting approval for this well to remain shut-in. Please refer to High Plains' letter dated May 12, 1993 for further information on the well and the area deemed suitable for waterflooding.
