Paraginton, New Mexico, September 26 19 52

Well No. D-1 is located 990 ft. from N line and 1650 ft. from W line of sec. 9

N 1/4 of section 9 T-32-N R-9-E N 27° 15' W  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Alamosa-La Plata San Juan New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is \_\_\_\_\_ ft. (To be reported later)

**DETAILS OF WORK**

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate muddling jobs, cementing points, and all other important proposed work)

We propose to drill the above well to approximately 5600 feet. Rotary tools will be used to total depth. Casing will be set on top of Cliffhouse. Mesa Verde formation will be drilled with gas and cleaned out with gas after shot with 52%.

The following casing program is proposed:

Size	Length	Cement	Remarks
9-5/8"	250	225	175% of calculated amount to circulate.
7"	4400	300	150% of calculated amount to fill 1260' above shoe.

Copies of location plate are attached. A copy of any survey taken will be submitted upon completion of well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
