DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Total depth 1470'. Plug back depth 1431' - ran electric log. Set 5-1/2" casing at 1467' with 80 sacks 6 percent gel cement with 1-1/2 pounds medium tuf per sack and followed by 50 sacks neat cement. After waiting on cement, tested casing with 3000 psi for 30 minutes which held with no indication of pressure drop. Released rig on March 12, 1960. Preparing for completion operations.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
