Mr. C. E. Jones
Douglas, Arizona

Dear Mr. Jones:

In answer to your letter of February 13, 1956 we find the following facts to be true, from a study of our records:

The John J. Moya #1 Jones well had a total production of 2446 MCF from February 1, 1955 through December 31, 1955. The price of this gas would be in the neighborhood of \$250.00, perhaps somewhat in excess of this figure, depending upon drip and condensate produced. I do not recall how many acres you have in this drill block but as the unit is set up on 160 acres you can figure the ratio your acreage bears to 160 acres and multiply this by 1/8 and find out what your interest would be. The above amount of production is very small and I understand that the well is making quite a large amount of water which has cut down production.

Mr. Petzer, who was associated with Mr. Moya in drilling this well was in our office recently and had with him an account of the total amount of money which has been received by he and Mr. Moya for production on this well. He was concerned by the fact that Mr. Moya had not taken care of paying royalty owners for their interest and stated that he was going to take care of the matter personally, so perhaps you will soon be getting your check for your share of the royalties.

You have inquired what department of El Paso Natural Gas Company pays Mr. Moya. All gas payments are made by El Paso Natural Gas Company in El Paso Texas; therefore you might address your letter to El Paso Natural Gas Company, Production Department, El Paso, Texas.

If we can be of any further assistance to you please let us know.

Yours very truly

Emery C. Arnold
Supervisor, District #3

THE COAST GUARD COMMISSION
AND THE GUARDIAN

February 11, 1966

Dear Sirs:

Thank you for your letter of February 11, 1966.

The Commission is pleased to hear that you are interested in the Commission's work.

The Commission is a non-profit organization which is dedicated to the improvement of the lives of the people of the United States. We are currently working on a number of projects which we believe will be of great benefit to the community. We are particularly interested in the area of education and health care. We are currently working on a number of projects which we believe will be of great benefit to the community. We are particularly interested in the area of education and health care. Subject: Jones - Moya well

Dear Mr. Arnold:

Since the gas well (Moya well) on our place has been hooked into the El Paso line for over a year now and we haven't received any return from it we would like to know if you could tell us how we could go about collecting our part of the returns.

We have written Mr. Moya but do not even get an answer. Even though it isn't producing much we feel that the land owners are entitled to their part.

Could you please give us an estimate of about the amount it has produced in the past year.

Also if you have the name of the department of El Paso Natural Gas who pays Mr. Moya, we would appreciate having it so we can write and find out from them what can be done about this.

Do you suppose it would be possible to have the company send our part direct to us, or in some way force Moya to do the right thing about paying the land owners.

We would appreciate very much hearing from you, and thank you.

Very truly yours
C. E. Jones.
