Gentlemen:

Your attention is directed to the general letter issued January 24, 1955, by the New Mexico Oil Conservation Commission outlining the procedure to be followed for prorating gas in the San Juan Basin. As pointed out in the letter, certain wells in the San Juan Basin could not be classified as standard gas proration units, and these wells were indicated as non-standard units on the March gas proration schedule for the San Juan Basin. Further, the letter points out that all non-standard gas proration units must have either administrative approval or a hearing by May 1, 1955, in order to remain on the gas proration schedule. In addition it was outlined in said letter that it would be necessary for all of the proper forms to be filed with the District Office at Antec, New Mexico, before a well could receive its allowable.

Our records indicate that the following well operated by you is a non-standard unit for which we have received no application requesting approval of said non-standard unit, and the necessary forms have not been filed with the Commission's District Office in Antec, New Mexico.

Astec-Pictured Cliffs Gas Pool

Florence 1 J 8-30-11

OIL CONSERVATION COMMISSION

P. O. BOX 871

SANTA FE, NEW MEXICO

Enclosed you will find a memorandum containing the
filling requirements for approval of non-standard gas production units.
If application for approval of the above listed non-standard gas production
units is not received and the necessary proper forms filled with our office
Office, this will can receive no allowance and will remain all the time
action scheduled.

Very truly yours,

CHARLES M. FISHER,
District Engineer
