J. . A-1111 "D" Farmington, New Mexico March 21, 1960Well No. 3 is located 1720 ft. from ALL line and 770 ft. from W line of sec. 10N¹/₄ S¹/₄ Section 10 T-30-N R-16-W N.A.P.M.
(1/₄ Sec. and Sec. No.) (Twp.) (Range) (Meridian)Lawrence Gallup San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)The elevation of the derrick floor above sea level is 5435 ft. (RDB)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Spudded 12-1/4" hole on March 21, 1960 and drilled to 95'. 8-5/8" casing was set at 95' with 80 sacks of cement containing 2 percent calcium chloride. Circulated 24 sacks of cement. After waiting on cement, tested casing and water shut off with 400 psi for 30 minutes, which held with no indication of pressure drop. Reduced hole to 7-7/8" at 95' and resumed drilling operations.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
