Dear Bill:

We have discovered that there is an error in the production total in the 1963 annual book for the Beta Development Company #1 Ruby Jones Well, G-7-30N-11W, Basin Dakota Pool.

By adding accumulative totals from previous years we find that the accumulative production to 1-1-64 should be 91,950 MCF instead of 528,139 MCF as shown in the 1963 annual report. Will you please make the appropriate corrections.

Yours very truly
