

6-29-99.

Ernie

Gilbert Huges w/ Conoco.
Run CBL from 2222' to Surface
ON. Faye Burdette #1 G-09-30N-11W.

He will be calling you regards to
Where to perforate.

CSG Tested But B.H. has steady
flow Gas. When he moved on it he
said it had 120psi B.H. I understood
it builds up 60-70^{psi} overnight,

They ran CBL + showed cement top at 1540'

I pulled file - he will call you Am 6-30
