Re: El Paso Natural Gas Well, Sunray 2-A,  
NE 10-30-10, Blanco Mesa Verde.

Dear Mr. Arnold:

The above captioned well was shut-in by El Paso for an interference test on June 8, 1956. This well was kept shut-in for a total period of 641 days being released for production on March 11, 1958.

We request that this well be exempt from a 1957 annual test due to its lengthy shut-in period. It is also desirable to keep this well producing now, not testing it for 1958 annual test until late this year so that it may make up as much previous allowable as possible.

Very truly yours,

  
H. L. Kendrick  
Gas Engineer
