Bradenhead Testing

Dear Mr. LeBlanc;

The enclosed copy of the 1993 Bradenhead Test on the referenced well indicates the bottom spool has not been dug out. Our records show the well has 7" casing at 4438' and a full string of 5-1/2" at 4396'. A review of past records shows the well was not dug out in 1990 and has probably never been properly tested. Please dig out, reschedule and retest the well prior to December 31, 1993.

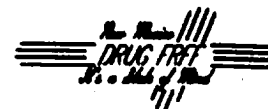

Notify this office 24 hours prior to the test so that we may provide a witness.

Yours Truly,

*Dianna K. Fairhurst*

Dianna K. Fairhurst
