January 2, 19 53

Well No. 1 is located 426 ft. from N line and 323 ft. from W line of sec. 4

Sec. 4 (1/4 Sec. and Sec. No.) 30N (Twp.) 7W (Range) N. M. P. M. (Meridian)
Blanco (Field) San Juan (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is 6233 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

El Paso Natural Gas Company moved rotary rig over the above well (formerly Blanco Gas Company's well, No. 1-15 Florence) on July 26, 1952, to work-over as intended in our Sundry Notice on July 29, 1952.

El Paso Natural Gas Company deepened the above well to 5100' where the pipe stuck, and this rig was unable to recover the fish of 21 joints tubing. August 12, 1952, this rig moved off location.

It is now intended to move a larger rotary rig on the H. K. Riddle No. 1 to recover stuck drill pipe and work well over as originally intended.

The intended total de. will be 5430'.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
