Well No. 67 is located 790 ft. from N line and 790 ft. from W line of sec. 6  
SE 1/4 SW 1/4 Sec. 6 30 N 13 W RMPM  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Basin Dakota San Juan New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 5670 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Plan to set 217' X 8-5/8" surface casing with 150 sacks cement.  
Drill 7-7/8" hole with mud through Dakota formation to TD of 6300'.  
Set 4-1/2" X 11.60# production casing to TD with 300 sacks cement-  
100 on Mesa Verde, 100 on Gallup and 100 sacks on Dakota.  
Perforate Dakota and sand-water frac with 3000 barrels.  
Land 2" tubing with perforated joint at inside TD.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Attention: Mr. William C. Russell, President

Administrative Order NSL-295

Gentlemen:

Reference is made to your application for an unorthodox location in the Basin Dakota Gas Pool for your Lunt Well No. 67 to be located 790 feet from the West and South lines of Section 6, Township 31 North, Range 13 West, NMPM, San Juan County, New Mexico. It is understood that the unorthodox location is necessitated by rough and uneven terrain within the proration unit to be dedicated to this well.

By authority vested in me under the rules governing the Basin-Dakota Gas Pool, you are hereby authorized to locate your Lunt Well No. 67 at the above described unorthodox location.

Very truly yours,

A. L. PORTER, Jr.  
Secretary-Director

OIL CONSERVATION COMMISSION

P. O. BOX 871

SANTA FE, NEW MEXICO

Dear Sir:

I am writing to you regarding the

oil conservation

commission and the

oil conservation commission

oil conservation commission

oil conservation

The oil conservation commission is a federal agency that is responsible for the conservation of oil resources. It was established in 1975 and is part of the Department of the Interior. The commission's main function is to develop and implement policies and programs that will ensure the efficient and responsible use of oil resources. This includes promoting energy conservation, developing alternative energy sources, and managing oil reserves. The commission also works to ensure that oil resources are used in a way that is consistent with the national interest and the environment.

The commission's work is important because oil is a finite resource and it is essential that we use it wisely. The commission's programs and policies help to ensure that we have enough oil to meet our needs for the future. The commission also works to ensure that oil resources are used in a way that is consistent with the national interest and the environment.

Sincerely,

Very truly yours,  
Director, Oil Conservation Commission
