Other 17. DESCRIES TROPOSES OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and sones pertinent to this work.) * ARCO Oil and Gas Company respectfully requests approval for extension of long term shut-in status on this well. Over the past two years, ARCO has reactivated several previously uneconomic long term shut-in wells and found commercial production. In addition, an ongoing CO2 feasibility study is underway which may yield significant additional oil recovery. Implementation of a CO2 flood would require the workover of existing wells, and the drilling of new wells. For these reasons, ARCO proposes that this well be maintained in the long term shut-in status so that the wellbore will be available, should future production tests indicate commercial production or should it be needed as part of a future CO2 flood. This plan eliminates the economic waste of potentially usable wellbores and promotes conservation. THIS APPROVAL EXPIRES SEP 0 1 1990 OIL CON. DIV. DIST. 3 18. I hereby certify that the foregoing is true and correct Sr. Prod Supr 08/30/89 TITLE (This space for Federal or State office use) DEC 01 1989 APPROVED BY CONDITIONS OF APPROVAL, IF ANY: area manager
