PROPOSED CASING AND CEMENTING PROGRAM

SIZE OF HOLE	SIZE OF CASING	WEIGHT PER FOOT	SETTING DEPTH	QUANTITY OF CEMENT

This well was originally the King Oil Co. Navajo "A" #4. (Thomas A Dugan King Kong #4)

We propose to re-enter this well by pulling the dry hole marker, drilling out the cement plugs and cleaning out to total depth of 1070' and test well.

If commercial production is indicated tubing will be run and the well placed on production.

IN ABOVE SPACE DESCRIBE PROPOSED PROGRAM: If proposal is to deepen or plug back, give data on present productive zone and proposed new productive zone. If proposal is to drill or deepen directionally, give pertinent data on subsurface locations and measured and true vertical depths. Give blowout prevention program, if any.
