The elevation of the derrick floor above sea level is **5489** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

January 27, 1959 -- Repotential Test.

The production for the first 24 hours was 105 barrels of fluid of which 100% was oil; none % emulsion; none % water and Gravity 40.8° API.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
