proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones perti-
nent to this work.) *

Production supported by this well makes it uneconomical to operate. The well
was shut in 6-12-70.

This well is in a large Unit which is now under waterflood operations. Future
plans are to conduct waterflood and tertiary recovery studies. These studies may
result in a revised waterflood plan or in a tertiary recovery program that may re-
quire the use of this well in order to recover the maximum amount of oil from this
reservoir.
