

NEW MEXICO OIL CONSERVATION COMMISSION

SANTA FE, NEW MEXICO

MISCELLANEOUS NOTICES

Submit this notice in triplicate to the Oil Conservation Commission or its proper agent before the work specified is to begin. A copy will be returned to the sender on which will be given the approval, with any modifications considered advisable, or the rejection by the Commission or agent, of the plan submitted. The plan as approved should be followed, and work should not begin until approval is obtained. See additional instructions in the Rules and Regulations of the Commission.

Gentlemen:

Following is a notice of intention to do certain work as described below at the

El Paso Natural Gas Co. Turner State Well No. 2 in ANE/4
Company or Operator Lease

of Sec. 2, T. 30N, R. 9W, N. M. P. M., Blanco Mesa Verde Field.
San Juan County.

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

It is intended to workover this well in the following manner:

1. Set tubing choke and pull tubing.
2. If tubing comes loose, set magnesium top drillable bridge plug at approx. 4350'.
3. Pull tubing spool and visually inspect 7" casing, pack-off before testing with packer.
4. If packing checks out, test casing for leaks.
5. Clean out to 5111' with mud. (If hole in casing)
6. Run 4 1/2" long string and cement with sufficient cement to cover 7" casing shoe.
7. Run correlation log, perforate and fracture.
8. Clean out, run tubing & move off.

If tubing does not come free:

9. Cut tubing off 30 - 50' up in 7" casing.
10. Clean out with gas if possible, otherwise set cement plug & whipstock.
11. Set bridge plug and follow steps 3 to 8.

If slips are leaking and no holes in casing:

12. Clean out with gas if possible, otherwise set cement plug & whipstock.
13. Complete as shown in steps 6 to 8.
