OIL CON. DIV.
DIST. 3

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

ARCO Oil and Gas Company desires to implement a polymer augmented waterflood in the Horseshoe Gallup Unit in an area that is currently being waterflooded. This well is one of eight wells in which we propose to inject polymer to recover additional oil not attainable through normal waterflooding.

We made application with the State of New Mexico (Form C-108, ("Application for Authorization to Inject"), to inject polymer into this well.
